

# Natural Gas Fired CO<sub>2</sub> Production System

In February, 2010, the **Wittmann Company, LLC**, contracted with BOC Bangladesh Limited (A Member of the Linde Group) for the supply of a 16.5 MTPD Natural Gas Fired CO<sub>2</sub> Production System. The plant was engineered at Wittmann's Engineering Headquarters in Palm Coast, Florida, USA, with fabrication and assembly done at Wittmann – India, Baroda, India, using components supplied from four continents. The plant was shipped in September, 2010, and successfully commissioned by Wittmann service personnel from India, Egypt and the Philippines, In January, 2011.

To the delight of BOC Bangladesh, the plant is operating at its design capacity of 16.5 MTPD and meeting ISBT CO<sub>2</sub> Quality Specifications, while operating costs are below guaranteed levels.
