

## **Nikkiso Clean Energy & Industrial Gases Group Announces their First On-Site FAT Testing at their Marine Facility in Busan, Korea**

### **FOR IMMEDIATE RELEASE**

**Temecula, CA, January 10, 2023** - Nikkiso Clean Energy & Industrial Gases Group ("Group"), a part of the Nikkiso Co., Ltd (Japan) group of companies, is proud to announce its first on-site FAT testing at their new Marine facility in Busan, Korea. This accomplishment exemplifies their commitment to and support of the growth of the Korean market.

Since July 2022, they have been fabricating high-pressure pump skids in the 4,000 square meter facility. With the successful completion of this FAT test for Hapag Lloyd AG (for the largest fuel gas supply system), they demonstrate the capabilities of their factory and its LN2 (liquid nitrogen) test facility. This facility continues to provide the commissioning and maintenance support previously provided. With the HP pumps skid fabrication and testing capabilities, they now provide full-system marine solutions to their customers.

The FAT test is mandatory prior to skid delivery, which tests for overall performance (i.e., pump maximum flowrate, vaporizer performance, lube-oil (LO) system, nitrogen purge system, cryogenic valves, etc.). It must be witnessed by shipowner, class society, and customers, verifying the product meets its performance requirements.

According to Jay Lee, General Manager, Korea, "Nikkiso ACD has been the preferred supplier for Fuel Gas skids to the Korean shipbuilding industry for over 20 years! With our new skid packaging and testing facility located near the shipyards in Korea, we now have even greater capacity to provide local support and meet the significant global marine demands."

"This is an important next step for our Group and the LNG powered Marine market, and an expanded benefit for our Marine customers. Nikkiso CE&IG will now be able to provide and test full systems and support our customers with a turnkey system solution," according to Peter Wagner, CEO of Cryogenic Industries and President of the Group.
